Our Core Values

Commitment to Innovation and Growth

We are always open to new ideas, and we seek developments in our sector including training potential talents and scientific community in Saudi Arabia and the Region.

Delivering Highest Quality Standards

We pay extreme attention to details in all aspects of our business operations to cater our entire value-chain with the best infrastructure and resources available today.

Being Available

Our promises are kept by being vividly available to any challenge that comes through us, whether it's developing a new medicine or entering new markets or just being there during critical situations.

Ensuring Safety and Security

We take the responsibility of health-safety to a personal level, as one of our commitments is to deliver thoroughly tested products.

OUR VISION

With over 25 years of expertise, being the market leader in biopharmaceuticals with cutting edge medicine-knowledge and technology in the region, Our responsibility at Pharma Pharmaceutical Industry promises to deliver care specialists with effective medicines for those who need them at the right moment.

Who we are

Pharma Pharmaceutical Industries (PPI) is a highly specialized pharmaceutical solutions provider to patients and healthcare specialists. Our presence across MENA market is continuously growing with the help of our regional and global alliances which maximize opportunities and cater for growing market demand.

We are committed to deliver solutions for increasing medical needs in different markets based on solid and extensive in-house medical, commercial Research and development capabilities.

Our high-tech factory is located in second industrial city, Riyadh, Saudi Arabia, with 2 buildings covering 6000 m², dedicated for pharmaceuticals, containing latest technology and advanced machinery, with more than 120 highly qualified and expert employees.

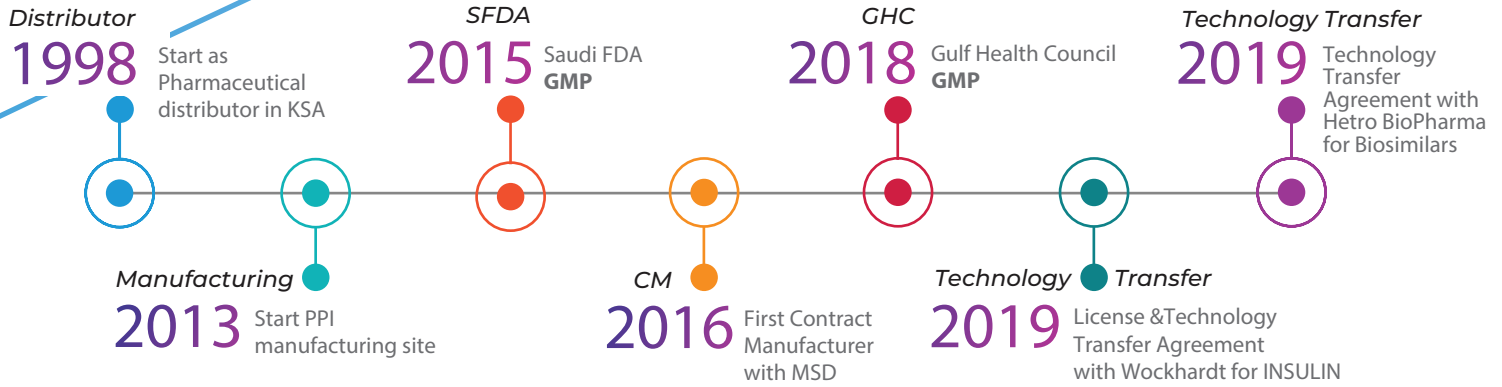

OUR MISSION

We are looking at a future where the advancement of medicines will be challenged by deeply informed and empowered care specialists and patients alike. We focus all our energies and work for a greater change that will improve access to medicines in Saudi Arabia and our region at large with the highest quality of medicines delivered to the market, Hence we commit to the following missions:

- 1 Set a new standard and Global benchmarks in quality, safety and public trust.
- 2 Commitment and contributions to the evolution of Biopharmaceuticals, Biology and Biosimilars.
- 3 Support innovation in new Medicine, and infrastructure required in the Saudi market.
- 4 Becoming the most cost effective and reliable medicine partner for regional & the global markets.
- 5 Developing Local Pharmaceutical Industries to its maximum potential.
- 6 Entering new markets.
- 7 Supporting medicine-education and technological development of future scientific leaders.
- 8 Medicine-safety and high quality health security.
- 9 Medicine Safety Awareness
- 10 This list can go on as many as PPI management wants as missions in pharma sector changes by time based on advancement of technology and scientific discoveries

Our Partners

Our Products

We will secure our future by building a leading Biological portfolio ... Establishing our leadership in key therapeutic areas

We work on a unique portfolio of high quality and niche pharmaceutical products that come inline with our growth strategy. We focus on niche generics and first to file and first to market products.

We work to deliver high quality products at affordable prices by leveraging global partnerships with the best FDA and EMA approved manufacturing facilities across the world. PPI believes that, with its strategic partnership model of global alliances with highly efficient pharmaceutical companies across the globe, we can deliver our market needs.

We have experienced team of professionals from the generics industry whose sole roles are to build a strong base for PPI generic business in Saudi and MENA markets.

Our Research and Development facilities provide a durable and continuous pipeline of new products. Our main generics products include oral solid dosage forms (tablets, capsules & sachets) We also work in Orodispersible films and injectables products.
